

LONG STROKE CHAMBERS FOR DRUM BRAKES

from **MGM** MGM Brakes

MGM Spring Brakes are known for their durability and we are proud that our products already utilize corrosion resistant materials: such as A360 aluminum, epoxy coating and clear trivalent chromate.

Corrosion Fighter Technology is a “standard” feature in our complete line of Tamper Resistant 3-Inch Long Stroke Model Chambers.

The design also ensures precise alignment of the power spring inside the brake. Accurate alignment of the head side of the power spring compliments our center hole diaphragm (CHD) design: already a standard feature in all TR 3-Inch Long Stroke Models: providing longer center seal and power spring life.

TR

- Ideal for over-the-road, regional, P&D, final mile applications for trucks.
- Trailers

TR-T

- Ideal for heavy duty vocational applications.
- Trailers

TR-TS

- Ultimate choice for severe service applications.

LTS

- Long Life premium model for multiple applications.
- Integral release bolt

Standard Features and Benefits of our Long Stroke Chamber

- Long Life power spring
- Heavy duty steel NPC
- Center Hole diaphragm technology
- Nylon reinforced nitrile rubber diaphragms
- Hybrid neoprene diaphragms available
- Available in threaded rod or welded yoke
- 0.5” longer stroke than standard stroke chambers
- Increased reserve stroke
- Increased braking performance during multiple brake applications
- Long stroke chambers standard equipment on most new trucks
- Corrosion Fighter Technology
